

PRATHAMESH UMAP

Front-End & Mobile Developer | Fintech Specialist

prathameshumap007@gmail.com • 9096220217 • Navi Mumbai, India

PROFESSIONAL SUMMARY

Front-End and Mobile Developer with 4.2+ years of experience building high-quality web and cross-platform mobile banking applications for UK financial institutions. Proven expertise in Angular, Ionic, Capacitor, TypeScript and JavaScript. Adept at building secure fintech apps with biometric authentication, OTA updates, QR login and multi-client consolidated codebases. Passionate about delivering secure, scalable fintech products aligned with UK financial regulations.

CORE SKILLS

Mobile	Ionic 6/7, Capacitor, iOS, Android, Cross-platform
Frontend	Angular (8–20+), HTML5, CSS3, Angular Material, Standalone Components, Signals
Languages	TypeScript, JavaScript, Core Java
Fintech Domain	UK Mobile Banking Apps, Biometric Auth, OTA Updates, QR Login, Force Update, Compliance
Firebase	App Analytics, Push Notifications, Firebase Integration
Tools / Cloud	VS Code, Xcode, Android Studio, GitHub, BitBucket, AWS EC2, Chrome DevTools
AI Tools	ChatGPT, Claude AI — Prompt Engineering for dev workflows

KEY ACHIEVEMENTS

- Delivered 4 production mobile banking apps for UK Building Societies — Bath, Monmouthshire, Earl Shilton and Harpenden — from development to App Store.
- Engineered a consolidated multi-client codebase architecture, enabling faster onboarding of new banking clients with minimal code duplication.
- Implemented advanced security features including biometric/PIN login, jailbreak/root detection and ProGuard obfuscation, ensuring compliance with UK financial regulations.
- Integrated OTA updates via Capacitor Updater, enabling live code deployments without full App Store release cycles.
- Proficient in prompt engineering using ChatGPT and Claude AI to accelerate development, generate boilerplate, debug logic and explore architectural solutions.

PROFESSIONAL EXPERIENCE

Angular / Mobile Developer | Consectus (India) Pvt. Ltd.

June 2024 – Present

UK Fintech — Mobile Banking Applications for Building Societies

- Bath Building Society Mobile App** — Ionic 6, Angular 19, Capacitor, iOS & Android
 - Built full-featured mobile banking app with biometric/PIN login, account statements, transaction history and mortgage balance views.
 - Enforced Force Update mechanism to prevent outdated app usage and ensure security compliance.

- Integrated Firebase Push Notifications and App Analytics to support user engagement and monitoring.
- ▶ **Monmouthshire Building Society Mobile App** — *Ionic 7, Angular, Capacitor*
 - Delivered a cross-platform banking solution with secure savings/mortgage access, biometric sign-in, digital statements and real-time transaction views.
 - Integrated QR Login / Multi-Device Login, allowing secure authentication across devices via QR scanning from an authenticated session.
- ▶ **Earl Shilton Building Society Mobile App** — *Ionic, Angular, Capacitor*
 - Engineered a feature-rich cross-platform banking application following the same secure architecture used across all UK building society clients.
 - Applied RxJS and Angular services for efficient state management and real-time UI updates.
- ▶ **Harpenden Building Society Mobile App** — *Ionic, Angular, Capacitor*
 - Delivered full mobile banking functionality — secure login, account management and transaction features tailored to Harpenden's requirements.
- ▶ **Teller — Desktop Banking Application** — *Electron, Angular, TypeScript*
 - Built a desktop banking application for branch staff supporting float management, passbook printing, cheque printing and customer transaction operations.

Shared Platform & Architecture Highlights

- Architected a Consolidated Project Setup — a single shared codebase powering all client apps, enabling faster deployment with minimal duplication.
- Integrated OTA (Over-The-Air) Updates using Capacitor Updater to push live code without full App Store releases.
- Integrated jailbreak/root detection to block access from compromised devices.
- Configured 16KB APK page alignment for Android 15+ compatibility and optimised ProGuard rules for production builds.
- Worked with Angular 20+ leveraging standalone components, signals-based reactivity and improved build pipeline.
- Collaborated with backend and QA teams to meet UK financial regulations and deliver high-quality releases.

Front-End Developer | Predict Solutions

June 2022 – May 2024

- ▶ **Roznama — Litigation Management Platform** — *Angular, TypeScript*
 - Enhanced a litigation management solution for legal departments to track, manage and report on litigations and arbitration matters; acted as a centralised document repository.
- ▶ **Career and Paths — Career Exploration Platform** — *Angular, Ionic*
 - Expanded a next-generation platform helping parents and children discover and plan career options globally.
- ▶ **Legatrix — Legal Compliance Tool** — *Angular*
 - Built dashboards for management visibility and a compliance matrix across laws and regulations.
- ▶ **Marathi Digi Madhyam (MDM App)** — *Android, Ionic*
 - Improved a mobile Android application delivering syllabus content for students from Class 1 to Class 10.
 - Participated in SCRUM meetings; ensured cross-browser compatibility across Chrome, Firefox, Safari and IE.
 - Gained experience with AWS EC2 for project deployment and cloud hosting.

EDUCATION

Bachelor's Degree in Electrical Engineering

2019 – 2022

P.R. Pote College of Engineering and Management, Amravati

Diploma in Electrical Engineering

2016 – 2019

P.R. Pote (Patil) Institute of Polytechnic and Technology, Amravati

PERSONAL DETAILS

Date of Birth: 15 November 1998 **Marital Status:** Single **Nationality:** Indian

Languages: English, Hindi, Marathi

Address: 104, Gangasagar, Sector 20, Ghansoli, Navi Mumbai – 400701
